**Management Discussion and Analysis**  
**For**  
**Freegold Ventures Limited**

**MANAGEMENT DISCUSSION & ANALYSIS**

The following discussion and analysis is management's assessment of the results and financial condition of Freegold Ventures Limited (the "Company" or "Freegold") for the three and nine month periods ended September 30, 2008 and should be read in conjunction with the consolidated financial statements for the nine month period ended September 30, 2008 and related notes contained in the report. The date of this management's discussion and analysis is November 10, 2008. Additional information on the Company is available on SEDAR at [www.sedar.com](http://www.sedar.com).

**Business of Freegold**

Freegold is an exploration stage company engaged in the acquisition, exploration and evaluation of mineral properties of merit with the aim of developing them to a stage where they can be exploited at a profit or to arrange joint ventures whereby other companies provide funding for development and exploitation.

**Forward looking statements**

Certain information included in this discussion may constitute forward-looking information within the meaning of Canadian securities laws including, without limitation, statements and information regarding the Company's exploration operations and financing needs. Such forward-looking information reflects the current expectations or beliefs of the Company. Forward-looking information is subject to a number of risks, assumptions and uncertainties that may cause the actual results of the Company to differ materially from those discussed herein, including the possibility that future exploration results will not be consistent with the Company's expectations, the uncertainties involved in interpreting exploration results, other inherent risks in the mineral exploration and development industry and the possibility that the loan facilities will not be completed or completed on terms not currently contemplated by the Company. Readers are cautioned not to place undue reliance on forward-looking information because it is possible that expectations, predictions, forecasts, projections and other form of forward-looking information will not be achieved by the Company. A change in any one of these factors could cause actual events or results to differ materially from those projected in the forward-looking information. Although the Company believes that the expectations reflected in such forward-looking statements and information are reasonable, the Company can give no assurance that such expectations will prove to be correct. Forward-looking statements and information are based on current expectations, estimates and projections that involve a number of risks and uncertainties which could cause actual results to differ materially from those anticipated by the Company and described in the forward-looking statements or information. The forward-looking statements and information are based on a number of assumptions which may prove to be incorrect. In addition to other assumptions identified herein, the Company has made assumptions regarding, among other things, the ability to conduct exploration activities in a timely manner and in accordance with the Company's drilling program, the availability and costs of financing, the degree of risk that credit approvals may be delayed or withheld, and other risks and uncertainties described elsewhere in this document or in the Company's other filings with Canadian securities authorities. Such forward-looking information speaks only as of the date on which it is made and, unless required by applicable securities laws, the Company undertakes no obligation to update any forward-looking information, whether as a result of new information, future events or results or otherwise.

## Review of Exploration Projects

### Golden Summit Project, Alaska

Since 1995, Freegold has accelerated its program of systematically exploring the Golden Summit Project – located 20 miles north of Fairbanks, Alaska, less than 5 miles from one of Alaska's largest gold mines (Kinross' 350,000 oz/year Fort Knox Mine), and 3 miles from Kinross' 2 million oz True North Mine. Freegold's 7-mile wide Golden Summit property is located at the center of the historic Fairbanks mining district, with approximately 7.25 million ounces of gold having been recovered from underground mines on the property and from the streams that drain the project area. This property contains over 80 known gold occurrences, and has hosted the district's largest and highest-grade historic underground gold producers, with over 500,000 ounces of gold being produced from 1902 to 1942 at average grades in excess of 1 oz/ton.

After progressive programs of trenching, shallow drilling and bulk sampling in 2006 and 2007 in the historic Cleary Hill mine area (which is situated on the western one fifth of the total property), Freegold identified a series of multiple 100 to 300 foot wide shear zones and vein swarms similar in width and grade to those being mined at Fort Knox. In addition to identifying bulk tonnage gold mineralization, Freegold's work has also intersected numerous higher grade veins and shear zones (example: 54 g/t gold over 2m, 29 g/t over 3 m, and 9 g/t over 12 m) that are traceable with good continuity through this area.

Freegold's programs in 2008 included an additional 40,000 foot RAB drilling program (Phase 2), which successfully extended the strike of these bulk tonnage zones thousands of feet to the west through further fences of shallow, closely spaced drill holes (now exceeding 1,200 holes). Phase 1 step out drilling in this western Tolovana area was conducted last year, and short drill fences 6 to 8 and 15 to 17 were able to trace an individual shear zone (Scheuyemere) across the Tolovana area which trended directly towards the central part of the 1,200 foot wide area of gold mineralization last delineated to the east in Fence 5 in 2007. This years RAB drilling conducted in this western area was designed to test the areas to the north and south of this individual shear zone. As was reported in April, drilling from the first fences (Fences 6 North and 17) successfully identified new bulk tonnage zones extending to the north of the Scheuyemere shear zone. All of the assays from the 46, 75-foot deep holes in Fence 6 North for example, which covered an 850 foot extension to the north averaged 0.52 g/t, which compares favourably with the current reported reserve grade of the Fort Knox mine of 0.50 g/tonne. Assays from the latest fences in this program (Fences 20, 6 South, 19 Extension and 18 South) were announced in September. These fences also confirmed the extension of these shear zones to the south in the Tolovana area and in the area between Tolovana and Cleary Hill. A map showing the locations of all of the drill fences in the Cleary Hill area at Golden Summit can be found at <http://www.freegoldventures.com/i/maps/map091808ITFa.pdf>. With the 2007 and 2008 shallow RAB drilling, these parallel mineralized zones now have over 1 mile of strike length, and the mineralization continues to remain open along strike in both directions and at depth.

Freegold's exploration program in 2008 also included the first systematic core drilling to trace the gold mineralization within these shear zones to depth. In October 2008, Freegold announced assay results from the first area tested with a small grid of deeper core holes in the Fence 1 area of the Cleary Hill Vein Swarm. Deeper core drilling in this area indicates that these shear zones can be extended to depth along the strike of the gold mineralization. Significant intercepts of down dip gold mineralization included 303 feet @ 0.027 oz/ton (92.4 m @ 0.93 g/t), 101 feet @ 0.046 oz/ton (30.8 m @ 1.58 g/t) and 55 feet @ 0.18 oz/ton (16.8 m @ 6.29 g/t). Initial RAB drilling in this same area in early 2007 consisted of 3 lines of 51 foot deep holes 20 feet apart. Each line of holes was 15 feet apart (collectively called Fence 1) in order to better determine the variability of the grade along strike. The three lines each encountered a mineralized zone approximately 300 feet wide, with average assays in the zone ranging between 0.74 g/t to 1.02 g/t. Diamond drilling in this area this year was aimed at testing the continuity of this zone at depth. A total of 13 core holes were drilled on a grid of three lines, with each hole and each line spaced 100 feet apart. Twelve holes were drilled to the north at an angle of 60 degrees, as the shears and veins in this area principally dip 50 to 60 degrees to the south. As smaller cross cutting structures were seen in this area

during earlier bulk sampling, one reverse hole was drilled to the south at an angle of 45 degrees. Diamond drilling in the Fence 1 area has only tested 200 feet of strike length.

Bulk sampling has also been ongoing on the project since mid 2006. Initial results from the sampling in 2007 were positive, with the first samples tested during the initial processing in late September and October of 2007 had a weighted average grade of 2.7 g/tonne (0.08 oz/ton), with individual stockpiles from a variety of areas tested ranging from 0.6 g/tonne (0.02 oz/ton) to 7.0 g/tonne (0.21 oz/ton).

To complement the bulk sampling program, Freegold built its own gold processing circuit. This plant, capable of processing up to 1,200 tons of material per day, is completely portable and is capable of recovering gold using chemical-free gravity concentration. The plant is completely stand-alone and includes a primary impact and secondary cone crushing plant capable of producing up to 250 tons per hour of minus ¼" material, three small ball mills to grind the material, followed by a gold collection circuit comprised of four varying sized Knelson concentrators. The plant is completely independent of any power grid with its own 1.2 MW of portable diesel power generation and its own material loading capabilities. Freegold commenced the shipment of gold concentrates from this seasonal processing operation in September to the Sunshine Refinery in Idaho, and will use the proceeds from the sale of gold to help offset the costs of the bulk sampling program. This modular plant can be torn down and transported quickly, and Freegold is currently investigating various projects where this plant could continue to be operated through the winter season in order to generate further cash flow for the company.

The bulk sampling program at Golden Summit is a seasonal operation, which was halted in mid-October due to the onset of freezing temperatures. Approximately 40,000 tons of material was sampled and processed in 2008, and the results of this program will be reported upon completion of all assays over the coming months.

With our systematic exploration programs of RAB drilling (with holes spaced 20 feet apart to depths of 75 feet, and also on 10 x 10 foot spacing for grade control) and core drilling, the Company has now identified multiple areas of bulk mineable gold mineralization from which numerous bulk samples totaling in excess of 50,000 tons have been extracted. Following the integration of all of this data as well as the 2008 field mapping work into a 3D model over the coming months, the Company should be in a much better position of understanding the geology and gold mineralization, which in turn should aid in determining the optimal drill method and hole spacing to use for future resource delineation purposes.

### **Almaden Gold Project, Idaho**

Freegold has re-activated this project and is currently in the process of expanding the known gold mineralization at its Almaden gold project. Located 12 miles east of Weiser, Idaho, this 2,980-acre property is within one mile of paved road and in close proximity (six miles) to Idaho Power's transmission lines. Freegold acquired its initial interest in this project in 1995, and increased its interest to 60% by completing a feasibility study in 1997. The 1997 study by Watts, Griffis and McOuat Limited is referenced in a report prepared in accordance with National Instrument 43-101 that was filed on SEDAR on March 15, 2006. The historic WGM 1997 study contemplated a 22,500-ton per day open-pit, heap leach operation producing an average of 95,000 ounces of gold per year at an overall 0.6 to 1 strip ratio. In 2001, Freegold purchased the remaining 40% interest and now controls 100% of this project, subject to the underlying lease and royalty agreements.

Almaden is a classic hot spring epithermal gold deposit. Gold mineralization occurs as a flat lying, tabular deposit dispersed beneath a thin impermeable opalite cap rock. There are two known zones of mineralization on the Almaden property: the Main Zone, and a smaller North Zone. Combined, these zones are roughly one mile in length, and gold mineralization extends from surface down to a currently known depth of 600 feet. Freegold's 43-101 report contained an independent resource calculation showing 515,834 ounces in the Indicated category (24,778,000 tons grading 0.021 oz/ton) and 359,802 ounces in the Inferred category (19,989,000 tons grading 0.018 oz/ton). This 2006 gold resource calculation at Almaden was defined by 677 drill holes (88% of which are less than 100 feet apart), with homogeneous mineralization exhibiting good continuity.

Freegold commenced a new drill program in July 2006 which ran until the end of 2007. One core rig and one reverse circulation rig drilled a total of 54,000 feet in 130 new holes during this period. This new drilling has successfully delineated depth extensions in the south, central and north-east sections of the Main Zone, with drilling within the area of the main feeder fault consistently extending mineralization an additional 150 to 300 feet below the 200-foot depth that was previously identified in shallow drilling. The drilling also indicates that the southern end of the Main Zone remains open for expansion, as does an area to the north west of the Main Zone, where resource grade mineralization was intersected within the Stinking Water basin. The new drilling has also intersected significant quantities of molybdenum that appears to be distributed fairly uniformly in the northern parts of the Main Zone and in the North Zone. Historically, none of the holes drilled by any Project operators prior to Freegold were assayed for molybdenum. The Company is still evaluating the significance of these molybdenum occurrences in relation to the genesis and configuration of the gold mineralization.

Our work on the 100% controlled Almaden project this year has focused on further quantification of the gold resource, and on defining other targets and associated minerals that have potential to add value to the project. Delays in finalizing our updated resource have principally been as a result of our small management team focusing our efforts on wrapping up the Golden Summit, Rob and Vinasale work programs before the onset of winter. With this work now having wound down, efforts are now being focused on the finalization of a new resource estimation, which is expected to upgrade a majority of the previous categorized mineralization into the measured and indicated categories following the completion of the 130 new drill holes and a new, comprehensive geological model.

The identification of molybdenum as an associated mineral in this deposit is also an important discovery for us, as the previous +700 holes drilled by prior operators were assayed only for gold and silver. Preliminary work has shown that the majority of the molybdenum in the deposit is in the oxide form, and initial metallurgical test-work has shown that it may be possible to extract both gold and molybdenum in the future using the same process flow-sheet. Following the release of the new resources, future work will focus on continuing to extend open areas of gold and molybdenum mineralization, on completing follow-up metallurgical testing to refine process design for both gold and molybdenum, and to commence preliminary studies aimed at determining the optimal economic manner (heap leach or mill) in which to develop the deposit.

Considerable work has also been undertaken during the year in further defining targets for bonanza-grade gold mineralization in the feeder zones under the lower grade surface mineralization. Almaden shares numerous similarities with other mines in northern Nevada where high grade gold veins have been found and mined below the disseminated, lower grade surface mineralization. In order to better understand the potential of our deposit at depth, two independent consultants were engaged earlier in the year that have considerable expertise in the discovery and evaluation of epithermal gold deposit. Both consultants have concluded that there is significant evidence to suggest that conditions may have been favourable for the deposition of bonanza grade gold in the well defined feeder zones at depth, and that drill testing of the feeder structures along their projected dips is warranted.

### **Rob Project, Alaska**

Acquired in 2002, Rob is the latest Freegold project in the Company's portfolio to undergo a new re-evaluation. Since acquiring the project, Freegold conducted limited reconnaissance work on this 106-claim property, confirming the presence of high-grade gold mineralization from various large soil anomaly locations originally identified by the WGM/Sumitomo exploration team in the early 1990's. This team was also responsible for the discovery of the nearby Pogo deposit, a 5.6 million oz gold deposit that is hosted in the same intrusive and metamorphic rocks, and on the flank of the same 18 mile long intrusive dome that hosts the Rob gold mineralization. Interest in the Goodpaster district, which hosts the Rob property, has picked up considerably with the commencement of production at the Pogo mine in 2006 (scheduled to be the largest gold mine in the State with annual production ranging from 350,000 to 450,000 oz/year) and most recently with the consolidation of a large land package surrounding the Pogo mine and our Rob property by the founder and former Chairman of Goldcorp., Robert McEwen.

In October 2007, Freegold announced the results of its first 17 diamond drill holes on the property. A total of 3,514 feet were drilled in the Grey Lead and O'Reely vein prospects following the receipt of significant gold assays from a limited surface sampling program. Although drilling within the O'Reely vein did not intersect the multi-ounce values sampled at surface, 7 holes within the Grey Lead vein consistently intersected thick intervals of high-grade gold mineralization that exhibit geological and geochemical characteristics very similar to those seen at the Pogo gold mine. True width drill intersects included a 13.5 foot interval averaging 20.1 g/t and 13 foot interval averaging 29.0 g/t.

Freegold was again active on the Rob property this season, with work focusing on drill testing the strike extension of high-grade Pogo-style veins intersected in last year's program, and on identifying new targets with ground geophysics and sampling. This year's drill program consisted of twelve new holes from six different pad locations, aimed at extending the strike of this vein. Assays received from the initial holes have continued to return good intervals including 7.9 feet @ 62 g/t gold, and 7.4 feet @ 35 g/t. As the Pogo mine is comprised of three principal stacked veins, the discovery and tracing of two additional veins running parallel to Grey Lead (both of which have returned grab samples up to 18 g/t and 75 g/t, and both of which have been traced over 850 feet at surface) was encouraging. Further work was also conducted on the eastern side of the property at the Michigan prospect, where prospecting and sampling has now traced a large intrusive hosted stock-work vein system over an approximate 3,500 foot by 2,500 foot area (with surface grab samples as high as 699, 175 and 121 g/t gold).

### **Vinasale Gold Project, Alaska**

On March 2, 2007, Freegold announced the signing of an Exploration with Option to Lease agreement on the Vinasale gold project. Vinasale is located 16 air miles south of McGrath, Alaska in a north trending belt of igneous intrusion-related deposits that includes the 33 million oz Donlin Creek deposit and the Nixon Fork gold mine. The property is under option from Doyon, Limited an Alaskan native regional corporation, which holds 100% of the property.

Significant gold mineralization was first discovered at Vinasale by Central Alaska Gold Company (CAGC) in 1990. Subsequent drilling by CAGC and then joint venture partner Placer Dome established an initial gold resource of 614,000 oz (10.4 million tons @ 0.057 oz/ton). While the gold mineralization was found to be refractory, metallurgical testing showed that up to 95% of the gold reported to the flotation concentrate, thereby considerably reducing the volume of material that would need to be processed in order to recover the gold. The property was subsequently optioned by ASA Montague in 1994 and additional soil sampling, followed by limited in-fill and expansion drilling was successful in further increasing the gold resource to 920,000 oz (18.04 million tons @ 0.051 oz/ton) based on the 36 holes that had been drilled into the Central Zone. (Note that these resource figures are historical in nature and are provided for informational purposes only. They are not 43-101 compliant, and as such should not be relied upon.) Previous wide-spaced drilling northeast and south of the Central Zone indicates these areas may have potential for resource expansion while previous limited reconnaissance work has indicated that additional gold mineralization exists on the property outside the area known to contain resources.

Freegold's exploration program in September 2007 was focused on evaluating the large land package surrounding the deposit, where limited systematic work has been conducted in the past. Freegold's reconnaissance efforts on the property in 2007 included a stream, soil and rock sampling program. This program was followed up with a 1,788 line kilometre high resolution EM and Magnetic airborne geophysical survey. While new areas of gold mineralization were detected in this regional program, the focus of exploration in 2008 was directed towards mapping, sampling and geophysics aimed at expanding the known extent of the gold mineralization within the Central Zone. This summer's geophysical program consisted of an induced polarization (IP) survey on areas north and north-east of the Central Zone. The preliminary results of this geophysical survey indicate that the anomaly associated with the Central Zone, although weaker, continues to the north and the north-east, where there is thought to be potential to expand the known resources.

### Selected annual information

Unless otherwise noted, all currency amounts are stated in Canadian dollars.

The following table summarizes selected financial data for Freegold for each of the three most recently completed financial years. The information set forth below should be read in conjunction with the consolidated audited financial statements, prepared in accordance with Canadian generally accepted accounting principles ("GAAP"), and related notes.

	Years Ended December 31, (audited)		
	2007	2006	2005
Total revenues	\$259,063	\$126,882	\$40,434
General and administrative expenses - cash	1,358,287	1,142,747	1,106,209
General and administrative expenses – stock compensation	1,388,088	367,918	221,799
Mineral property costs	8,169,365	3,310,465	1,114,827
Income (loss) before extraordinary items			
➤ In total	(2,907,463)	(1,510,665)	(1,328,008)
➤ Basic and diluted loss per share	(0.06)	(0.04)	(0.04)
Net income (loss) before income taxes			
➤ In total	(4,384,463)	(1,772,633)	(1,368,370)
➤ Basic and diluted loss per share	(0.08)	(0.05)	(0.04)
Totals assets	\$23,722,900	\$12,381,233	\$9,431,704
Total long term liabilities	Nil	Nil	Nil
Cash dividends declared	Nil	Nil	Nil

### Selected quarterly financial information

The following selected financial information is derived from the unaudited consolidated interim financial statements of the Company prepared in accordance with Canadian GAAP.

	For the Quarters Ended (unaudited)							
	Sept. 30 2008	June 30 2008	Mar. 31 2008	Dec. 31 2007	Sept. 30 2007	June 30 2007	Mar. 31 2007	Dec. 31 2006
Total revenues	\$2,670	\$18,746	\$26,498	\$84,171	\$22,462	\$37,144	\$115,286	\$44,728
Net loss – before tax	1,352,727	849,291	1,290,046	1,646,304	2,182,190	281,983	273,986	717,993
Net loss per share	0.02	0.01	0.02	0.02	0.04	0.01	0.01	0.02
Total assets	29,537,893	24,787,497	23,998,295	23,722,900	20,565,891	21,245,193	14,244,958	12,381,233

### Results of operations

The nine month period ended September 30, 2008 resulted in a net loss of \$3,492,064 which compares with a loss of \$2,738,159 for the same period in 2007. General and administrative expenses for the nine month period ended September 30, 2008 were \$2,674,651, an increase of \$1,189,512 over the same period in 2007. Most of the increase is attributable to \$1,663,201 in non-cash stock-based compensation expenses that were charged upon the granting of long-term incentive stock options and performance shares.

During the period, 2,660,000 stock options were granted under a graded vesting schedule. The total fair value of stock options that vested using the Black-Scholes Option Pricing Model resulted in stock-based compensation expense of \$1,140,424 for the period ended September 30, 2008 (2007:\$40,193). Stock-based compensation for performance shares issued was \$522,777 for the period ended September 30, 2008 (2007:\$494,825).

Professional fees of \$135,263 (2007:\$31,002) were recorded as additional legal expenses were incurred during the period to assist in the preparation of various equipment and bridge loan documents. Interest on the US\$5,791,000 loan amounted to \$102,009 and a 4% loan fee of \$165,720 was paid to the short term loan lenders.

Amortization for office equipment of \$12,225 for the nine month period ended September 30, 2008 (2007:\$22,064) was recorded. Mining equipment amortization of \$325,601 was attributed to \$1,991,947 in mining equipment that was obtained for the Golden Summit project in Alaska.

A foreign exchange loss of \$207,790 was recorded on US\$5,791,000 in loans that are payable in US funds. This resulted as the US dollar became stronger relative to the Canadian dollar.

Shareholder relations and promotional activities undertaken by the Company, which included attendance at various trade shows, advertising, property site visits, news releases, distribution fees and marketing materials, cost \$185,906 for the period ended September 30, 2008, an increase of \$46,249 over the same period in 2007. In April, a part-time consultant was hired to assist with investor relations.

All other general and administrative costs were relatively the same when compared to the previous nine month period.

Capital gains of \$12,734 were realized on the sale of investments in 2008 as compared to \$146,901 over the same period in 2007. Interest income of \$35,180 was also earned in 2008 (2007: \$27,991) as the Company had more funds on deposit.

During the nine month period ended September 30, 2008, the Company incurred mineral property deferred exploration costs of \$6,241,532. Of the deferred exploration costs, \$415,380 was incurred to review and update previous engineering and resource work and \$140,433 was incurred for assays on the Almaden project in Idaho. \$2,415,303 was incurred on the Golden Summit project in Alaska of which \$1,589,708 was for drilling and assays and \$2,497,282 was for bulk sampling/plant commissioning and infrastructure. An estimate of the amount of contained gold within the concentrates in process at the end of the nine month period amounted to \$487,910 and was taken as a credit against Golden Summit expenditures. \$1,050,857 was incurred in mapping, geophysics and drilling on the Rob project in Alaska, and \$144,404 was incurred on the Vinasale Alaska project.

Mineral property acquisition costs of \$587,565 were also incurred which included \$108,005 for the Almaden Idaho project, \$72,100 for the Vinasale Alaska project, \$2,500 in cash and \$305,000 in shares for the Rob Alaska project and \$99,960 for the Golden Summit Alaska

### **Third quarter results**

The quarter ended September 30, 2008 resulted in a loss of \$1,352,727 as compared with a loss of \$2,182,190 earned in the comparative quarter. Some of the decrease is attributable to \$371,509 (2007: \$507,380) in stock-based compensation expenses that were charged upon the granting of long-term incentive stock options and performance shares.

Professional fees of \$97,320 (2007:\$12,139) were recorded as legal counsel was required to assist in the preparation of various loan documents. Interest on the US\$5,791,000 loan amounted to \$102,009 and a 4% loan fee of \$165,720 was paid to the short term loan lenders. Warrants with a value of \$200,000 were issued along with the short term loans of which \$63,521 has been expensed during the period, with the balance of \$136,479 being shown as a deferred financing cost.

Mining equipment amortization of \$147,011 for the three month period ended September 30, 2008 (2007:\$Nil) was attributed to \$1,991,947 in mining equipment that was obtained for the Golden Summit project in Alaska.

A foreign exchange loss of \$204,460 (2007:\$97) was recorded on US\$5,791,000 in loans that are payable in US funds. This resulted as the US dollar became stronger relative to the Canadian dollar.

There were no write-offs of mineral property costs as compared to \$1,364,402 written off in the 3 month period ended September 30, 2007.

All other quarterly expenses are consistent with the discussion of the year-to-date loss in the previous paragraph and elsewhere in this interim MD&A.

The Company issued 133,333 performance shares for proceeds of \$1,333 in the third quarter of 2008. 24,500 stock options were exercised at an exercise price of \$0.48 for proceeds of \$11,760 and 500,000 shares valued at \$305,000 were issued for the Rob property in Alaska. Stock options with a vested amount of \$293,536 and performance shares with a vested amount of \$77,973 were recognized during the quarter.

### **Liquidity and capital resources**

At September 30, 2008, the Company's working capital, defined as current assets less current liabilities, was a deficit of \$4,161,376 compared to a surplus of \$4,124,121 at December 31, 2007. \$4,240,000 of this deficit relates to short term loans that have a maturity date of January 15, 2009. During 2008, 554,000 options were exercised for proceeds of \$262,260 and 628,786 performance shares issued for \$6,288.

The Company has an investment with a value of \$24,982 as at September 30, 2008. The investment consists of 73,000 shares of Pacific North West Capital Corp. previously received as joint venture property payments. These amounts are included in the above working capital. The Company had 64,226,593 issued and outstanding shares at September 30, 2008.

As at September 30, 2008, the Company had an estimated amount of \$487,910 in contained gold within concentrates being processed as part of the Company's Golden Summit bulk sampling program. Additional gold concentrates were shipped to the refinery through the month of October 2008.

During the period, a US \$1,791,000 convertible loan was obtained secured against bulk sampling related equipment at Golden Summit and against private property that was recently purchased in January 2008 adjacent to the Golden Summit property. The loan has a term of 2 years, with the Lenders having the right to accelerate the maturity of the facility any time after the first anniversary of the closing, should the Company raise additional debt, equity or receive asset sales aggregating \$3 million or more. The Lenders also have the right during the term to convert the outstanding principal, in whole or in part, into the Company's common shares at a conversion price of US \$1.23/share. The interest rate for the loan is 4% per annum, payable quarterly. No fees were paid in relation to the closing or arrangement of this facility.

On July 31, 2008 the Company secured a US \$2 million short term loan financing and on August 22, 2008, the Company received from a second lender an additional US \$2 million short term loan, bringing total short term loan proceeds to US \$4 million.

The first US \$2 million bridge loan facility has a maturity date of January 15, 2009. Terms for this facility include an annual interest rate of 12.5% payable monthly, a cash closing fee, and 350,000 warrants to the lenders to purchase common stock of the Company for a two year period at a price of \$0.66 per share. The lenders will have the right to put the warrants back to the Company one year after closing of the bridge for value of \$100,000. The second US\$2 million loan has the identical terms, except the strike price of the warrants is at \$0.55 per share. The loans can be prepaid at any time, and all proceeds generated from subsequent financings must be used to repay the loans.

These warrants have a value of \$200,000 of which \$63,521 has been expensed during the period. The balance of \$136,479 is shown as a deferred financing cost.

To fund its working capital, including exploration activities and corporate expenses, the Company requires continued access to capital markets to raise financing through equity and debt offerings. The Company is in the process of obtaining additional capital for the repayment of the short term loans, and for ongoing working capital purposes. (see "Risks and Uncertainties" below for a discussion of associated risk factors).

## Contractual commitments

The Company is committed under operating leases, for its office premises in Kerrisdale, Vancouver and Idaho.

Fiscal year ended Dec. 31,	2008	2009	2010	Thereafter
Office lease - Kerrisdale	\$38,460	-	-	-
Office lease - Vancouver	\$9,285	\$21,667	-	-
Office lease - Idaho	\$8,586	\$14,310	-	-

## Off-balance sheet arrangements

The Company has no off-balance sheet arrangements.

## Critical accounting estimates

A detailed summary of all the Company's significant accounting policies is included in Note 1 to the consolidated financial statements for the nine month period ended September 30, 2008.

Significant estimates used in the preparation of these consolidated financial statements include, amongst other things, amortization, determination of net recoverable value of assets, determination of fair value on, taxes, contingencies and stock-based compensation.

## Change in accounting policies

### Financial instrument standards

Effective January 1, 2007, the Company adopted the new Canadian Institute of Chartered Accountants ("CICA") Handbook Section 3855, Financial Instruments – Recognition and Measurement; Section 3865, Hedges; Section 1530, Comprehensive Income; and Section 3861, Financial Instruments – Disclosure and Presentation (the "Financial Instrument Standards"). These new standards have been adopted on a prospective basis with no restatement to prior period financial statements.

The Financial Instrument Standards require that adjustments to the carrying value of financial assets and liabilities be recorded within retained earnings or, in the case of available-for-sale assets, accumulated other comprehensive income on transition.

The Company has certain investments in the common shares of publicly traded corporations, which are classified as available-for-sale. Although these investments represent common shares that are traded on a recognized stock exchange, the Company may not be able to sell its investments at the quoted market price. Accordingly, the value of these investments is determined with reference to the quoted market price and an appropriate discount. On transition, the value of these investments was consistent with historical cost. As a result, adoption of the new standard did not have a material impact on the Company's consolidated financial statements, on transition at January 1, 2007 or during the nine month period ended September 30, 2008.

The principal changes resulting from the adoption of the Financial Instrument Standards are as follows:

### Financial assets and financial liabilities

Under the new standards, financial assets and liabilities are initially recognized at fair value and are subsequently measured based on their classification as held-to-maturity, loans and receivables, available-for-sale or held-for-trading, as described below. The classification is not changed subsequent to initial recognition.

### Held-to-maturity and loans and receivables

Financial instruments that have a fixed maturity date, where the Company intends and has the ability to hold to maturity, are classified as held-to-maturity and measured at amortized cost using the effective interest rate method. Loans and receivables are measured at amortized cost using the effective interest method.

### Available-for-sale

Financial assets classified as available-for-sale are carried at fair value (where determinable based on market prices of actively traded securities) with changes in fair value recorded in other comprehensive income. Available-for-sale securities are written down to fair value through earnings whenever it is necessary to reflect an other-than-temporary impairment. Transaction costs that are directly attributable to the acquisition or issue of a financial asset or financial liability are added to its fair value.

### Held-for-trading

Financial assets and financial liabilities that are purchased and incurred with the intention of generating profits in the near term are classified as held-for-trading. These instruments are measured at fair value with the change in the fair value recognized in income.

### Derivatives and hedge accounting

The Company does not hold or have any exposure to derivative instruments and accordingly is not impacted by CICA Handbook Section 3865, Hedges.

### Comprehensive income

Comprehensive income is composed of the Company's earnings and other comprehensive income. Other comprehensive income includes unrealized gains and losses on available-for-sale securities, foreign currency translation gains and losses on the net investment in self-sustaining operations and changes in the fair market value of derivative instruments designated as cash flow hedges, all net of income taxes. Cumulative changes in other comprehensive income are included in accumulated other comprehensive income which is presented (if applicable) as a new category in shareholders' equity.

### Future Changes in Accounting Policies

There are five new CICA accounting standards that have been issued but not yet adopted by the Company. These five standards will become effective for the Company on February 1, 2008. The Company is currently assessing the impact of these new accounting standards on its financial statements.

CICA Handbook Section 3031 "Inventories" prescribes the accounting treatment for inventories and provides guidance on the determination of inventory costs and their subsequent recognition as an expense, including any write-down to net realizable value. CICA Handbook Section 3064 – Goodwill and Intangible Assets, replaces CICA 3062 "Goodwill and Intangible Assets" and establishes revised standards for the recognition, measurement, presentation and disclosure of goodwill and intangible assets. CICA Handbook Section 1535 "Capital Disclosures" establishes standards for disclosing information about an entity's capital and how it is managed. CICA Handbook Section 3862 "Financial Instrument Disclosures" and Handbook Section 3863, "Financial Instruments – Presentation" requires entities to provide disclosure of quantitative and qualitative information in their financial statements that enable users to evaluate (a) the significance of financial instruments for the entity's financial position and performance; and (b) the nature and extent of risks arising from financial instruments to which the entity is exposed during the period and at the balance sheet date, and management's objectives, policies and procedures for managing such risks. CICA

Handbook Section 1400, "General Standards on Financial Statement Presentation", has been amended to include requirements to assess and disclose an entity's ability to continue as a going concern.

#### International Financial Reporting Standards ("IFRS")

In 2006, the Canadian Accounting Standards Board ("AcSB") published a new strategic plan that will significantly affect financial reporting requirements for Canadian companies. The AcSB strategic plan outlines the convergence of Canadian GAAP with IFRS over an expected five year transitional period. In February 2008 the AcSB announced that 2011 is the changeover date for publicly-listed companies to use IFRS, replacing Canada's own GAAP. The date is for interim and annual financial statements relating to fiscal years beginning on or after January 1, 2011. The transition date of January 1, 2011 will require the restatement for comparative purposes of amounts reported by the Company for the year ended December 31, 2010. While the Company has begun assessing the adoption of IFRS for 2011, the financial reporting impact of the transition to IFRS cannot be reasonably estimated at this time.

Effective January 1, 2007, the Company adopted the revised CICA Handbook Section 1506, Accounting Changes, which requires that a voluntary change in accounting policy can be made only if the changes result in more reliable and relevant information and are accompanied with disclosures of prior period amounts and justification of the changes. The section also requires that the nature and amount of material changes in estimates be disclosed. The Company has not made any voluntary change in accounting policies or significant changes in estimates that are not otherwise disclosed since the adoption of the revised section.

#### **Financial instruments and other instruments**

Freegold's financial instruments consist of cash and cash equivalents, term deposits, accounts and advances receivable, portfolio investments, accounts payable, accrued liabilities, secured loans and amounts due to related parties. Unless otherwise noted, it is management's opinion that Freegold is not exposed to significant interest, currency or credit risks arising from the financial instruments. The fair value of these financial instruments approximates their carrying value due to their short-term maturity or capacity of prompt liquidation.

The Company is exposed to currency risk on its acquisition and exploration expenditures on its U.S. properties since it has to convert Canadian dollars raised through equity financing in Canada to US dollars. The Company's expenditures are negatively impacted by increases in the U.S. versus the Canadian dollar.

#### **Outstanding share data**

The Company is authorized to issue unlimited common shares without par value. As at November 10, 2008, there were 64,226,593 outstanding common shares compared to 62,543,307 outstanding shares at December 31, 2007. The increase reflects the issuance of 628,786 performance shares, 554,500 shares on the exercise of options and 500,000 for the Rob mineral property.

As at November 10, 2008, there were 3,450,000 warrants outstanding that include 700,000 warrants issued during the quarter to the lenders of the US\$4 million loan.

	Number	Price per Share	Expiry Date
	2,750,000	\$1.60	26 June 2009
	350,000	\$0.66	31 July 2010
	350,000	\$0.55	22 August 2010
Total	3,450,000		

Directors, officers, employees and contractors are granted options to purchase common shares under the Company Stock Option Plan. This plan and its terms and outstanding balance are disclosed in Note 7d to the consolidated financial statements to September 30, 2008.

Number Outstanding 31 December 2007	Granted	Exercised	Cancelled	Expired	Number Outstanding 30 September 2008	Exercise Price Per Share	Expiry Date

3,135,000	2,660,000	(554,500)	(125,000)	(295,500)	4,820,000		

### Related party transactions

The related party transactions during the nine months ended September 30, 2008, which occurred in the normal course of operations and were measured at the exchange amount (the amount of consideration established and agreed to by the related parties), were as follows:

- Each outside director is entitled to receive \$500 per month, \$500 per directors meeting and \$500 per committee meeting. The Chairman is entitled to receive an additional \$833 per month. During the period, the Company paid \$35,500 to directors.
- During the period, the Company paid \$95,940 for engineering and consulting fees to a company controlled by the Vice-President of Project Development.
- During the period, the Company paid \$39,666 for professional fees to a company controlled by the Chief Financial Officer.

### Disclosure controls and internal controls over financial reporting

The Company has established disclosure controls and procedures to ensure that information disclosed in this MD & A and the related consolidated financial statements was properly recorded, processed, summarized and reported to the Company's Board and Audit Committee. The Company's CEO and CFO have evaluated and are satisfied with the effectiveness of these disclosure controls and procedures for the nine month period ending September 30, 2008.

The CEO and CFO acknowledge responsibility for the design of internal control over financial reporting (ICFR), and confirm that there were no changes in these controls that occurred during the most recent period ended September 30, 2008 which materially affected, or are reasonably likely to materially affect the Company's ICFR.

### Risks and uncertainties

The Company believes that the following items represent significant areas for consideration.

## ***Industry***

The Company is engaged in the exploration of mineral properties, an inherently risky business. There is no assurance that funds spent on the exploration and development of a mineral deposit will result in the discovery of an economic ore body. Most exploration projects do not result in the discovery of commercially mineable ore deposits.

## ***Commodity Prices***

The profitability of the Company's operations will be dependent upon the market price of mineral commodities. Mineral prices fluctuate widely and are affected by numerous factors beyond the control of the Company. The prices of mineral commodities have fluctuated widely in recent years. Current and future price declines could cause commercial production to be impracticable. The Company's revenues and earnings also could be affected by the prices of other commodities such as fuel and other consumable items, although to a lesser extent than by the price of mineral commodities.

## ***Competition***

The mining industry is intensely competitive in all of its phases, and the Company competes with many companies possessing greater financial resources and technical facilities than itself with respect to the discovery and acquisition of interests in mineral properties, the recruitment and retention of qualified employees and other persons to carry out its mineral exploration activities. Competition in the mining industry could adversely affect the Company's prospects for mineral exploration in the future.

## ***Foreign Political Risk***

The Company's material property interests are currently located in the United States. A significant portion of the Company's interests are exposed to various degrees of political, economic and other risks and uncertainties. The Company's operations and investments may be affected by local political and economic developments, including expropriation, nationalization, invalidation of government orders, permits or agreements pertaining to property rights, political unrest, labour disputes, limitations on repatriation of earnings, limitations on mineral exports, limitations on foreign ownership, inability to obtain or delays in obtaining necessary mining permits, opposition to mining from local, environmental or other non-governmental organizations, government participation, royalties, duties, rates of exchange, high rates of inflation, price controls, exchange controls, currency fluctuations, taxation and changes in laws, regulations or policies as well as by laws and policies of Canada affecting foreign trade, investment and taxation.

## ***Government Laws, Regulation & Permitting***

Mining and exploration activities of the Company are subject to both domestic and foreign laws and regulations governing prospecting, development, production, taxes, labour standards, occupational health, mine safety, waste disposal, toxic substances, the environment and other matters. Although the Company believes that all exploration activities are currently carried out in accordance with all applicable rules and regulations, no assurance can be given that new rules and regulations will not be enacted or that existing rules and regulations will not be applied in a manner which could limit or curtail production or development. Amendments to current laws and regulations governing the operations and activities of the Company or more stringent implementation thereof could have a substantial adverse impact on the Company.

The operations of the Company will require licenses and permits from various governmental authorities to carry out exploration and development at its projects. There can be no assurance that the Company will be able to obtain the necessary licences and permits on acceptable terms, in a timely manner or at all. Any failure to comply with permits and applicable laws and regulations, even if inadvertent, could result in the interruption or closure of operations or material fines, penalties or other liabilities.

### ***Title to Properties***

Acquisition of rights to the mineral properties is a very detailed and time-consuming process. Title to, and the area of, mineral properties may be disputed. Although the Company has investigated the title to all of the properties for which it holds mineral leases or licenses or in respect of which it has a right to earn an interest, the Company cannot give an assurance that title to such properties will not be challenged or impugned.

The Company has the right to earn an increased interest in certain of its properties. To earn its 100% this increased interest in each property, the Company is required to make certain cash payments. If the Company fails to make these payments, the Company may lose its right to such properties and forfeit any funds expended to such time.

### ***Estimates of Mineral Resources***

The mineral resource estimates used by the Company are estimates only and no assurance can be given that any particular level of recovery of minerals will in fact be realized or that an identified resource will ever qualify as a commercially mineable (or viable) deposit which can be legally or commercially exploited. In addition, the grade of mineralization ultimately mined may differ from that indicated by drilling results and such differences could be material.

### ***Cash Flows and Additional Funding Requirements***

The Company has limited financial resources, no sources of operating cash flows and no assurances that sufficient funding, including adequate financing, will be available. If the Company's exploration programs are successful, additional funds will be required in order to complete the development of its properties. The sources of funds currently available to the Company are the sale of marketable securities, raising of equity capital or the offering of an interest in its projects to another party. There is no assurance that the Company will be successful in raising sufficient funds to conduct further exploration and development of its projects or to fulfill its obligations under the terms of any option or joint venture agreements, in which case the Company may have to delay or indefinitely postpone further exploration and development, or forfeit its interest in its properties or prospects.

### ***Key Management***

The success of the Company will be largely dependent upon the performance of its key officers, consultants and employees. Locating mineral deposits depends on a number of factors, not the least of which is the technical skill of the exploration personnel involved. The success of the Company is largely dependent on the performance of its key individuals. Failure to retain key individuals or to attract or retain additional key individuals with necessary skills could have a materially adverse impact upon the Company's success.

### ***Volatility of Share Price***

Market prices for shares of early stage companies are often volatile. Factors such as announcements of mineral discoveries, financial results, and other factors could have a significant effect on the price of the Company's shares.

### ***Foreign Currency Risk***

A substantial portion of the Company's expenses are now, and are expected to continue to be incurred in United States currency. The Company's business will be subject to risks typical of an international business including, but not limited to, differing tax structures, regulations and restrictions and general foreign exchange rate volatility. Fluctuations in the exchange rate between the Canadian dollar and United States dollar may have a material effect on the Company's business, financial condition and results of operations

and could result in downward price pressure for the Company's products in or losses from currency exchange rate fluctuations. The Company does not actively hedge against foreign currency fluctuations.

### ***Conflict of Interest***

Some of the Company's directors and officers are directors and officers of other natural resource or mining-related companies. These associations may give rise from time to time to conflicts of interest. As a result of such conflict, the Company may miss the opportunity to participate in certain transactions.

### **Outlook**

On July 31, 2008 the Company secured a US \$2 million loan financing and on August 22, 2008, the Company received from a second lender an additional US \$2 million loan, bringing total short term loan proceeds to US \$4 million. These short term loans are due in January, 2009 and make up \$4,240,000 of the September 30, 2008 working capital deficit of \$4,161,376.

In order to repay these short term loans and to provide additional working capital, the Company is in the process of obtaining additional funding, and has commenced negotiations for a new, longer term debt based facility. While there can be no assurances that such a facility may be completed, the Company is also investigating project joint ventures, and business combinations as an alternative means securing additional longer term funding for the Company.

### **Approval**

The Board of Directors of Freegold has approved the disclosure contained in this interim MD&A. A copy of this interim MD&A will be provided to anyone who requests it.

## **Notes to Consolidated Financial Statements- Unaudited**

### **30 September 2008 and 2007**

Canadian Funds

---

#### **1. Nature/Continuance of Operations/Going Concern and Significant Accounting Policies**

##### **a) Nature, Continuance of Operations and Going Concern**

Freegold Ventures Limited (the "Company") is in the process of acquiring, exploring and developing precious metal mineral properties. The Company will attempt to bring the properties to production, structure joint ventures with others, option or lease properties to third parties or sell the properties outright. The Company has not determined whether these properties contain ore reserves that are economically recoverable and the Company is considered to be in the exploration stage. The recoverability of the amounts expended by the Company on acquiring and exploring mineral properties is dependent upon the existence of economically recoverable reserves, the ability of the Company to complete the acquisition and/or development of the properties and upon future profitable production.

These consolidated financial statements have been prepared assuming the Company will continue on a going-concern basis. Several adverse conditions cast substantial doubt on the validity of this assumption. The Company has incurred losses since inception, has a working capital deficit of \$4,161,376 at 30 September 2008 and has accumulated an operating deficit of \$32,256,313 at 30 September 2008. If the Company is to advance or develop its mineral properties further, it will be necessary to obtain additional financing and/or attract joint venture partners and while it has been successful in doing so in the past, there can be no assurance that it will be able to do so in the future.

##### **b) Consolidation**

These consolidated financial statements include the accounts of the Company's wholly owned subsidiaries, Free Gold Recovery, USA, Freegold Ventures Limited, USA, Ican Minerals, Inc. and Canu Resources, Inc. All subsidiaries are US corporations which are involved in mineral property exploration. Inter-company balances are eliminated upon consolidation.

##### **c) Cash and Cash Equivalents**

The Company considers cash and cash equivalents to include amounts held in banks and highly liquid investments with remaining maturities at point of purchase of 90 days or less. The Company places its cash and cash equivalents with institutions of high-credit worthiness.

##### **d) Available-for-sale Securities**

Available-for-sale securities are reported at fair value based on quoted market prices. Unrealized gains and losses on available for sale securities are included in shareholders' equity as a component of other comprehensive income.

##### **e) Mineral Properties and Deferred Exploration Expenditures**

The Company records its interests in mineral properties at cost. The costs of acquiring mineral properties and related exploration and development expenditures, holding costs to maintain a property and related foreign exchange amounts are deferred and would be amortized against future production following commencement of commercial production or are written-off if the properties are sold, allowed to lapse or are abandoned.

Option payments received are treated as a reduction of the carrying value of the related mineral property and deferred costs until the receipts are in excess of costs incurred, at which time they are credited to income. Option payments are at the discretion of the optionee, and accordingly, are recorded on a cash basis.

## **Notes to Consolidated Financial Statements- Unaudited**

### **30 September 2008 and 2007**

Canadian Funds

---

#### **1. Nature and Continuance of Operations and Significant Accounting Policies - Continued**

##### **e) Mineral Properties and Deferred Exploration Expenditures - Continued**

Management of the Company regularly reviews the net carrying value of each mineral property. Where events or changes in circumstances suggest impairment, estimated future cash flows are calculated using estimated future prices, proven and probable reserves, value beyond proven and probable reserves, probability weighted outcomes and operating capital and reclamation costs on an undiscounted basis. If it is determined that the future cash flows are less than the carrying value, a write-down to the estimated fair value is expensed for the period. The Company presently has no proven or probable reserves. Where estimates of future net cash flows are not available and where other conditions suggest impairment, management assesses if carrying values can be recovered. If the carrying values exceed estimated recoverable values, then the project is written-down to estimated fair values with the write-down expensed in the period.

Management's estimates of future mineral prices, recoverable resources, initial and operating capital and reclamation costs are subject to certain risks and uncertainties that may affect the recoverability of mineral property costs. Although management has made its best estimate of these factors, it is possible that changes could occur that could adversely affect management's estimate of the net cash flows to be generated from its properties.

##### **f) Asset Retirement Obligation**

On 1 May 2004, the Company retroactively adopted the new CICA accounting standard, Section 3110 for "Asset Retirement Obligations". Operating under this Section, future obligations to retire an asset or property are recognized and recorded as a liability at fair value as at the time the asset is acquired or the event occurs giving rise to such an obligation. At each reporting period, asset retirement obligations are increased to reflect the interest element (accretion expense) considered in the initial fair value of the measurement of the liabilities. In addition, an asset retirement cost is added to the carrying amount of the related asset and depreciated over the life of the asset. The capitalized asset retirement cost is amortized on the same basis as the related asset and along with the accretion expense, before arriving at the net income.

##### **g) Amortization**

The Company provides for amortization on its property, plant and equipment at 20% - 45% on a declining balance method. One half of the rate is applied in the year of acquisition.

##### **h) Share Capital**

Share capital issued for non-monetary consideration is recorded at an amount based on fair market value.

## **Notes to Consolidated Financial Statements- Unaudited**

### **30 September 2008 and 2007**

Canadian Funds

---

#### **1. Nature and Continuance of Operations and Significant Accounting Policies - Continued**

##### **i) Stock-Based Compensation**

All stock-based awards made to employees and non-employees are measured and recognized using the Black-Scholes valuation model. For employees, the fair value of the options is measured at the date of the grant. For non-employees, the fair value of the options is measured on the earlier of the date at which the counterparty performance is complete or the date the performance commitment is reached or the date at which the equity instruments are granted if they are fully vested and non-forfeitable. For employees and non-employees, the fair value of the options is accrued and charged to operations, with the offsetting credit to contributed surplus, on a straight-line basis over the vesting period. If and when the stock options are ultimately exercised, the applicable amounts of contributed surplus are transferred to share capital. The Company estimates forfeiture of stock-based awards based on historical data and adjusts the forfeiture rate periodically.

##### **j) Loss per Share**

Basic loss per share is based on the weighted average number of common shares issued and outstanding during the period. The effect of potential issuances of shares under options and warrants would be anti-dilutive, and therefore basic and diluted loss per share are the same.

##### **k) Income Taxes**

The asset and liability method is used for determining future income taxes. Under the asset and liability method, the change in the net future income tax asset or liability is included in income. The income tax effects of differences in the periods when revenue and expenses are recognized, in accordance with the Company's accounting practices, and the periods they are recognized for income tax purposes are reflected as future income tax assets or liabilities. Future income tax assets and liabilities are measured using the statutory income tax rates which are expected to apply to taxable income in the years in which temporary differences are expected to be recovered or settled. A valuation allowance is provided to the extent that it is more likely than not that future income tax assets will not be realized.

##### **l) Foreign Currency Translation**

The Company's subsidiaries are integrated foreign operations and their results and financial position are translated into the Company's functional currency, the Canadian dollar, using the temporal method as follows:

- Monetary assets and liabilities at period-end rates;
- All other assets and liabilities at historical rates; and
- Revenue and expense items at the average rate of exchange prevailing during the period.

Translation gains and losses arising from these transactions are reflected in income or expense in the year that they occur.

## **Notes to Consolidated Financial Statements- Unaudited**

### **30 September 2008 and 2007**

Canadian Funds

---

#### **1. Nature and Continuance of Operations and Significant Accounting Policies - Continued**

##### **m) Management's Estimates**

The preparation of financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the dates of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Significant areas where management's judgement is applied are the determination of asset impairment, stock-based compensation and future income tax valuation allowances. Actual results could differ from those estimates.

##### **n) Flow-through Shares**

Canadian Income Tax Legislation permits an enterprise to issue securities referred to as flow-through shares, whereby the investor can claim the tax deductions arising from the renunciation of the related resource expenditures. When resource expenditures are renounced to the investors and the Company has reasonable assurance that the expenditures will be completed, future income tax liabilities are recognized (renounced expenditures multiplied by the effective tax rate) thereby reducing share capital.

##### **o) Performance Shares**

The Company grants performance shares to attract consultants and/or employees to the Company. Performance shares are valued at market price on the date of issuance and charged to operations with the offsetting credit to share capital.

##### **p) Fair Value of Financial Instruments**

The Company's financial instruments consist of cash and cash equivalents, term deposits, accounts and advances receivable, available-for-sale securities, accounts payable, accrued liabilities, loan payable and amounts due to related parties. Unless otherwise noted, it is management's opinion that the Company is not exposed to significant interest, currency or credit risks arising from the financial instruments. The fair value of these financial instruments approximates their carrying value due to their short-term maturity or capacity of prompt liquidation.

The Company is exposed to currency risk on its acquisition and exploration expenditures on its US properties since it has to convert Canadian dollars raised through equity financing in Canada to US dollars. The Company's expenditures will be negatively impacted if the US dollar increases versus the Canadian dollar.

## **Notes to Consolidated Financial Statements- Unaudited**

### **30 September 2008 and 2007**

Canadian Funds

---

#### **1. Nature and Continuance of Operations and Significant Accounting Policies - Continued**

##### **q) Recent Accounting Pronouncements**

In June 2007, the CICA issued changes to Section 1400, General Standards of Financial Statement Presentation. Section 1400 has been amended to include requirements to assess and disclose an entity's ability to continue as a going concern. Management shall make an assessment of an entity's ability to continue as a going concern. When management is aware, in making its assessment, of material uncertainties related to events or conditions that may cast significant doubt upon the entity's ability to continue as a going concern, those uncertainties shall be disclosed. When financial statements are not prepared on a going concern basis, that fact shall be disclosed, together with the basis on which the financial statements are prepared and the reason why the entity is not regarded as a going concern. Section 1400 is effective for interim and annual financial statements relating to fiscal years beginning on or after 1 January 2008. Earlier adoption is encouraged. The adoption of this standard will have no impact on the Company's operating results or financial position and management expects that there will not be a material impact on the Company's financial statement disclosure.

In December 2006, the CICA issued Section 1535, Capital Disclosures. The main features of the new section are as follows:

- Requirements for an entity to disclose qualitative information about its objectives, policies and processes for managing capital;
- A requirement for an entity to disclose quantitative data about what it regards as capital; and
- A requirement for an entity to disclose whether it has complied with any externally imposed capital requirements and, if not, the consequences of such non-compliance.

Section 1535 is effective for interim and annual financial statements relating to fiscal years beginning on or after 1 October 2007. The adoption of this standard will have no impact on the Company's operating results or financial position and management is currently in the process of evaluating the impact that these additional disclosure standards will have on the Company's financial statements.

In December 2006, the CICA issued Handbook Section 3862, Financial Instruments – Disclosures and Section 3863, Financial Instruments – Presentation. Section 3862 modifies the disclosure requirements of Section 3861 and requires entities to provide disclosures in their consolidated financial statements that enable users to evaluate the significance of financial instruments on the entity's consolidated financial position and performance, and the nature and extent of risks arising from financial instruments and non-financial derivatives. Section 3863, Financial Instruments – Presentation carries forward unchanged the presentation requirements for financial instruments of Section 3861, Financial Instruments – Disclosures and Presentation. Section 3862 and 3863 apply to interim and annual consolidated financial statements relating to fiscal years beginning on or after 1 October 2007.

## **Notes to Consolidated Financial Statements- Unaudited**

### **30 September 2008 and 2007**

Canadian Funds

---

## **2. Changes in Accounting Policies and Presentation**

### **a) Financial Instrument Standards**

Effective 1 January 2007, the Company adopted the new Canadian Institute of Chartered Accountants ("CICA") Handbook Section 3855, Financial Instruments – Recognition and Measurement; Section 3865, Hedges; Section 1530, Comprehensive Income; and Section 3861, Financial Instruments – Disclosure and Presentation (the "Financial Instrument Standards"). These new standards have been adopted on a prospective basis with no restatement to prior period financial statements.

The Financial Instrument Standards require that adjustments to the carrying value of financial assets and liabilities be recorded within retained earnings or, in the case of available-for-sale assets, accumulated other comprehensive income on transition.

The Company has certain investments in the common shares of a publicly traded corporation, which are classified as available-for-sale. Although these investments represent common shares that are traded on a recognized stock exchange, the Company may not be able to sell its investments at the quoted market price. Accordingly, the value of these investments is determined with reference to the quoted market price and an appropriate discount. On transition, the value of these investments was consistent with historical cost. As a result, adoption of the new standard did not have a material impact on the Company's financial statements, on transition at 1 January 2007 or during the year ended 31 December 2007.

The principal changes resulting from the adoption of the Financial Instrument Standards are as follows:

#### **Financial Assets and Financial Liabilities**

Under the new standards, financial assets and liabilities are initially recognized at fair value and are subsequently measured based on their classification as held-to-maturity, loans and receivables, available-for-sale or held-for-trading, as described below. The classification is not changed subsequent to initial recognition.

#### **Held-to-Maturity and Loans and Receivables**

Financial instruments that have a fixed maturity date, where the Company intends and has the ability to hold to maturity, are classified as held-to-maturity and measured at amortized cost using the effective interest rate method. Loans and receivables are measured at amortized cost using the effective interest method.

#### **Available-for-sale**

Financial assets classified as available-for-sale are carried at fair value (where determinable based on market prices of actively traded securities) with changes in fair value recorded in other comprehensive income. Available-for-sale securities are written down to fair value through earnings whenever it is necessary to reflect an other-than-temporary impairment. Transaction costs that are directly attributable to the acquisition or issue of a financial asset or financial liability are added to its fair value.

## Notes to Consolidated Financial Statements- Unaudited

30 September 2008 and 2007

Canadian Funds

### 2. Changes in Accounting Policies and Presentation – Continued

#### a) Financial Instrument Standards – Continued

##### Held-for-trading

Financial assets and financial liabilities that are purchased and incurred with the intention of generating profits in the near term are classified as held-for-trading. These instruments are measured at fair value with the change in the fair value recognized in income.

##### Derivatives and Hedge Accounting

The Company does not hold or have any exposure to derivative instruments and accordingly is not impacted by CICA Handbook Section 3865, Hedges.

##### Comprehensive Income

Comprehensive income is composed of the Company's earnings and other comprehensive income. Other comprehensive income includes unrealized gains and losses on available-for-sale securities, foreign currency translation gains and losses on the net investment in self-sustaining operations and changes in the fair market value of derivative instruments designated as cash flow hedges, all net of income taxes. Cumulative changes in other comprehensive income are included in accumulated other comprehensive income which is presented (if applicable) as a new category in shareholders' equity.

#### b) Accounting Changes

Effective 1 January 2007, the Company adopted the revised CICA Handbook Section 1506, Accounting Changes, which requires that a voluntary change in accounting policy can be made only if the changes result in more reliable and relevant information and are accompanied with disclosures of prior period amounts and justification of the changes. The section also requires that the nature and amount of material changes in estimates be disclosed. The Company has not made any voluntary change in accounting policies or significant changes in estimates that are not otherwise disclosed since the adoption of the revised section.

**a) Golden Summit Property, Alaska, USA**

By various agreements dated from 1 December 1992 to 9 May 1997, the Company acquired from Fairbanks Exploration Inc. ("FEI") certain mineral claims in the Fairbanks Mining District of Alaska known as the Golden Summit Property, subject to a 7% working interest held in trust for FEI by the Company. The property is controlled by the Company through long-term lease agreements or outright claim ownership. As consideration, the Company issued 125,000 shares and expended US\$1,767,000 on the property before 2000. The Company is also required to make all underlying lease payments (*Note 4a(i-iii)*).

The Company will fund 100% of the project until commercial production is achieved at which point FEI will be required to contribute 7% of any approved budget. The property is subject to a 2% Net Smelter Royalty ("NSR") to FEI. The Company has a 30 day right of first refusal in the event that the 7% working interest of FEI or the NSR is to be sold. The Company can also purchase the NSR at any time following commercial production, based on its net present value as determined by mineable reserves.

#### 4. Mineral Property Costs – Continued

##### a) Golden Summit Property, Alaska, USA – Continued

###### **Underlying Leases**

###### (i) **Keystone Claims**

By agreement dated 17 May 1992, the Company agreed to make advance royalty payments of US\$15,000 per year. By an agreement dated 15 May 2000 and 30 November 2001, the Company agreed to make advance royalty payments as follows:

	US Funds	
1992 – 1998 (US\$15,000 per year)	\$ 105,000	(paid)
2000	\$ 50,000	(\$25,000 paid in cash and \$25,000 with 58,898 treasury shares issued)
2001- 2006 (US\$50,000 per year)	\$ 300,000	(paid)
2007 (US\$150,000 per year)	\$ 150,000	(paid)
2008 (US\$150,000 per year)	\$ 150,000	(paid US\$75,000)
2009 – 2019 (US\$150,000 per year)	\$ 1,650,000	

An amendment signing bonus of US\$50,000 was paid 1 October 2000.

The leased property is subject to a 3% NSR.

###### (ii) **Newsboy Claims**

By lease agreement dated 28 February 1986 and amended 26 March 1996, the Company assumed the obligation to make advance royalty payments of US\$2,500 per year until 1996 (paid) and US\$5,000 per year until 2006 (paid). During 2006, the Company renewed the existing lease term for an additional 5 years on the same terms and conditions. The claims are subject to a 4% NSR. The Company has the option to purchase the NSR for the greater of the current value or US\$1,000,000 less all advance royalty payments made.

###### (iii) **Tolovana Claims**

In May 2004, the Company entered into an agreement with a third party (the "Seller") whereby the Seller transferred 100% of the rights via Quit Claim Deed to a 20-year lease on the Tolovana Gold Property in Alaska.

Under the terms of the agreement, the Company assumed all of the Seller's obligations under the lease, which include making annual payments of \$1,000 per month for the first 23 months increasing to \$1,250 per month for the 24th to the 48th months and increasing to \$1,500 after the 49th month and for the duration of the lease. These payments are current.

The property is subject to a sliding scale NSR as follows: 1.5% NSR if gold is below US\$300, 2.0% NSR in the event the price of gold is between US\$300 to US\$400, and 3.0% NSR in the event that the price of gold is above US\$400. In addition, the Company made a cash payment of US\$7,500 on signing and issued 400,000 shares on regulatory approval. An additional 200,000 shares are to be issued within 30 days of a minimum 200,000 ounce mineral resource being calculated on the property if the resource is established in five years or less from the date of the agreement.

#### **4. Mineral Property Costs - Continued**

##### **b) Almaden Property, Washington County, Idaho, USA**

By agreement dated 13 December 1995 and various amendments thereto, the Company purchased a 60% interest in certain mineral claims located in Washington County, Idaho, known as the Almaden Property. As consideration, the Company paid US\$250,000 to underlying optionors, issued 4,621,714 common shares and completed a feasibility study.

Pursuant to the Company submitting a feasibility report, the Company entered into a joint venture agreement whereby 60% of all further costs spent on the property were the responsibility of the Company. The joint venture assumed the requirements to pay US\$250,000 to underlying optionors (paid), US\$4 per month for each acre acquired (approximately US\$10,000 per year [paid to date]) and US\$24,000 per year (US\$6,000 annually [paid to date] with the remaining US\$18,000 deferred for payment upon commencement of commercial production). The accumulated contingent liability for lease payments due on commencement of commercial production is US\$450,000. In March 2007, the Company entered into an agreement whereby in consideration for the conversion of the 4% net returns to a 1.5% NSR, the Company agreed to advance the accumulated lease payments over 4 years and waive its right to defer US\$18,000 per year in lease payments. The Company is now responsible for making US\$24,000 per year in lease payments. In the event that the Company does not make the total accrued lease payments, the lease holders shall retain the 4% net returns, however, the Company will remain responsible for making the US\$24,000 annual lease payments.

By agreement dated 17 April 2001, the Company acquired the remaining 40% portion of the joint venture interest and 100% of the shares of Ican Minerals, Inc. and Canu Resources, Inc. for 500,000 shares of the Company (issued). The Company now owns a 100% interest in the Almaden Property, subject to underlying lease agreements.

The property is also subject to a 1% NSR if the average price of gold is less than US\$425 per ounce and 2% if the average price of gold is equal to or greater than US\$425 per ounce.

##### **c) Rob Property, Alaska, USA**

By agreement dated 9 July 2002, the Company has the option to earn a 100% interest in a 20-year lease on certain mineral claims located in the Good Paster Mining District, Alaska, known as the Rob Property.

As consideration, the Company paid US\$29,000 and issued 1,000,000 shares. In addition, the Company is also required to expend a total of US\$1,000,000 in exploration expenditures on the property prior to 31 December 2008 (completed). Minimum work in any given year shall not be less than US\$10,600 per year.

During the period, the company reached the US\$1,000,000 level of cumulative expenditures on the property and issued an additional 500,000 shares of the Company. In addition, the vendor retains a 1% NSR which the Company may purchase for US\$1,000,000.

The Company is also responsible to make cash payments of US\$80,000 (paid) for an underlying agreement with the vendor.

### **30 September 2008 and 2007**

Canadian Funds

---

#### **4. Mineral Property Costs – Continued**

##### **c) Rob Property, Alaska, USA – Continued**

Commencing 1 December 2008, annual advance royalty payments must be made depending on the average gold price for the proceeding year as follows:

Gold Price Per Ounce	Annual Royalty Payment
Less than US\$350	US\$30,000
US\$350 to US\$400	US\$40,000
More than US\$400	US\$50,000

The vendor shall retain a NSR, which shall vary according to the London gold price for the preceding six-month period as follows: 1% for gold prices less than US\$300, 1.5% for gold prices between US\$301 and US\$350, and 2% for gold prices greater than US\$350. The NSR may be purchased for US\$500,000 for each percentage point. An undivided 100% interest in the property may be purchased for US\$1,500,000.

##### **d) Vinasale Property, Alaska, USA**

During the previous year, the Company entered into a mineral exploration agreement with an option to lease from the Doyon Native Corporation on the Vinasale property in central Alaska. Under the Agreement, the Company must make cash payments of US\$320,000 over five years (US\$50,000 first year paid, US\$60,000 second year paid), make annual scholarship donations of US\$10,000, (US\$10,000 first and second year paid) and make minimum exploration expenditures totalling US\$4,750,000 (US\$300,000 first year -completed). The Company may at its option enter into a one year extension by making an additional cash payment of US\$100,000 and incurring an additional US\$1,500,000 in exploration expenditures. In the event the property is reduced by 50% or more, the additional exploration expenditures shall be reduced to US\$1,000,000.

##### **e) Union Bay Property, Alaska, USA**

The Company acquired certain mineral claims known as the Union Bay Property, in Alaska, USA, by way of staking.

- (i) By agreement dated 1 October 2002 and amended 2 April 2003, the Company granted to PFN, a company that previously had certain directors in common, an option to earn a 70% interest in the property by purchasing a private placement of \$165,000 (2002) and making cash payments of \$100,000 (received), issuing 60,000 shares (received) and incurring exploration expenditures of \$1,000,000 (completed).

PFN vested with a 50% interest on 1 July 2006 and accordingly issued 253,586 shares pursuant to the agreement. Following vesting, PFN had the right to elect within 45 days to increase its interest to 60% by completing a feasibility study within 12 months of having vested. This election was not made.

By Memorandum of Agreement dated 4 May 2007, the Company and PFN confirmed their 50:50 interest in the property.

**4. Mineral Property Costs – Continued**

**f) PGM A Property, Sudbury Region, Ontario, Canada**

By various agreements dated between 6 March and 19 December 2000, the Company acquired a property in the Sudbury region, Ontario known as the PGM A Property. During a prior year, the Company earned a 100% interest in the property by making cash payments of \$100,000, issuing 300,000 shares and incurring exploration expenditures of \$50,000. The Company is also required to issue a further 100,000 shares to the optionor upon the completion of a bankable feasibility study.

The property is subject to a 3% NSR. The Company has the right to purchase up to 2% of the NSR for \$3,000,000 (the first 1% for \$1,000,000 and the second 1% for \$2,000,000).

By Letter Agreement dated 16 November 2001, the Company granted to PFN, a company that previously had certain directors in common, an option to earn a 70% interest in PGM A Property for cash payments of \$55,000 (received), issuance of 20,000 PFN shares (received) and exploration expenditures on the property of \$50,000 (completed).

PFN has the right to purchase an additional 30% interest in the property by paying the Company \$750,000. The Company and PFN will share the NSR buyout privileges in proportion to their respective interests.

During the prior year, all costs associated with the property have been written off.

**g) Grew Creek Property, Yukon Territory, Canada**

By Letter Agreement dated 27 May 2004, the Company had the right to acquire, from a third party, up to a 100% interest in certain mineral claims known as the Grew Creek Property located in Whitehorse Mining District, Yukon Territory. To acquire a 100% interest in the property, the Company was, at its option, required to complete the following: issue 200,000 shares (issued), make cash payments of \$305,000 (\$150,000 paid) and incur exploration expenditures of \$1,500,000.

During the prior year, the Company terminated this agreement. Accordingly, all costs associated with the property have been written off.

**5. Property, Plant and Equipment**

	Cost	Accumulated Amortization	September 30, 2008 Net Book Value	Dec. 31, 2007 Net Book Value
Mining equipment	\$ 1,991,947	\$ (475,270)	\$ 1,516,677	\$ 889,875
Land	1,611,675	-	1,611,675	107,000
Vehicles	42,972	(9,957)	33,015	-

#### **6. Related Party Balances and Transactions**

Except as noted elsewhere in these consolidated financial statements, related party transactions are as follows:

- a) Effective 1 January 2005, each outside director is entitled to receive \$500 per month, \$500 per directors' meeting and \$500 per committee meeting. During the 9 month period, \$35,500 was accrued/paid to directors.
- b) During the period, professional fees of \$39,666 were paid to a company controlled by the Chief Financial Officer.
- c) During the period, consulting fees of \$95,940 were paid to a company controlled by the Vice-President of Project Development.

The above transactions are measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

---

#### **7. Share Capital**

##### **a) Private Placements**

During the prior year, the Company closed a non-brokered private placement of 5,500,000 units for gross proceeds of \$6,325,000. Each unit was priced at \$1.15 and consisted of one common share and one-half non-transferable share purchase warrant. Each whole warrant entitles the holder to purchase one additional common share at a price of \$1.60 per share exercisable until 26 June 2009. At 30 September 2008, all of these share purchase warrants in this series remained outstanding.

During the prior year, the Company closed a non-brokered private placement of 5,100,000 units for gross proceeds of \$2,805,000. Each unit was priced at \$0.55 and consisted of one common share and one non-transferable share purchase warrant. Each warrant entitled the holder to purchase one additional common share at a price of \$0.75 per share exercisable until 28 February 2009. The Company had the right to accelerate the warrant expiration on 30 days written notice in the event that after 6 months, the closing bid price of the shares was equal to or above \$1.10 per share for any consecutive 20-day period. At 31 December 2007, none of the share purchase warrants in this series remained outstanding.

##### **b) Exercise of Warrant and Options**

- i) During the period, no warrants were exercised.
- ii) During the period, 554,500 options were exercised for gross proceeds of \$262,260.

**Notes to Consolidated Financial Statements- Unaudited**  
**30 September 2008 and 2007**

Canadian Funds

**7. Share Capital – Continued**

**c) Share Purchase Warrants**

As at 30 September 2008, the following share purchase warrants are outstanding:

	Number	Price per Share	Expiry Date
	2,750,000	\$1.60	26 June 2009
	350,000	\$0.66	31 July 2010
	<u>350,000</u>	\$0.55	22 August 2010
Total	<u>3,450,000</u>		

During the period, 700,000 common share purchase warrants having a fair value of \$200,000 were issued relating to US \$4,000,000 in short term loan financing.

During the prior year, 7,850,000 common share purchase warrants having a fair value of \$1,645,559 were issued relating to two private placements.

**d) Share Purchase Options**

The Company has established share purchase option plans whereby the Board of Directors (the "Board"), may from time to time, grant options to directors, officers, employees or consultants to a maximum of 10,129,247 options. At the Company's Annual and Special Meeting held on 28 April 2008, shareholders approved a resolution which amended the option plans to cap the number of options and performance shares outstanding to 10 % of the issued and outstanding shares, which at the time of the approval was 6,353,543. Options granted must be exercised no later than five years from date of grant or such lesser period as determined by the Board. The exercise price of an option is not less than the closing price on the Toronto Stock Exchange on the last trading day preceding the grant date. Options vest upon the discretion of the Board.

A summary of the Company's options at 30 September 2008 and the changes for the period are as follows:

Number Outstanding 31 December 2007	Granted	Exercised	Cancelled	Expired	Number Outstanding 30 September 2008	Exercise Price Per Share	Expiry Date
820,000	-	(524,500)	-	(295,500)	-	\$0.48	10 September 2008

**30 September 2008 and 2007**

Canadian Funds

**7. Share Capital – Continued**

**d) Share Purchase Options - Continued**

Effective 1 January 2003, the Company adopted the recommendations of CICA Handbook Section 3870, Stock-based compensation (*Note 1i*). The standard requires that stock-based awards made to employees and non-employees are to be measured and recognized using a fair value based method. During the period, the Company transferred \$68,415 from contributed surplus to share capital as required when options were exercised.

During the period, the Company granted the following options and recognized the following costs with respect to options granted in 2008:

Grant Date	Granted	Exercise Price	Fair Value	2008 Vested Amount
8 February 2008	100,000	\$1.50	\$73,610	\$23,618
21 February 2008	2,410,000	\$1.42	1,722,985	954,760
10 April 2008	150,000	\$1.42	58,992	14,748
<b>Total</b>	<b>2,660,000</b>		<b>\$1,855,587</b>	<b>\$993,126</b>

During prior years, the Company granted the following options and recognized the 2008 vested amount as follows:

Grant Date	Granted	Exercise Price	Fair Value	2008 Vested Amount
13 March 2006	350,000	\$0.35	\$86,864	\$10,858
21 September 2006	100,000	\$0.50	28,662	9,554
11 January 2007	350,000	\$0.50	106,095	39,786
13 July 2007	25,000	\$1.50	25,280	8,426
16 October 2007	40,000	\$1.71	40,412	15,155
1 November 2007	150,000	\$2.10	193,384	63,519
<b>Total</b>	<b>1,015,000</b>		<b>\$480,697</b>	<b>\$147,298</b>

The total estimated fair value of the 3,675,000 options is \$2,336,284. Since the options were granted under a graded vesting schedule, \$1,140,424 of the total fair value has been recorded in the Company accounts as stock-based compensation expenses during 2008. The offsetting entry is to contributed surplus.

**Notes to Consolidated Financial Statements- Unaudited**  
**30 September 2008 and 2007**

Canadian Funds

**7. Share Capital – Continued**

**d) Share Purchase Options – Continued**

The fair value of each option grant is estimated on the date of grant using the Black-Scholes option-pricing model with the following weighted average assumptions:

	<b>2008</b>	2007	2006
Expected dividend yield	<b>0.00%</b>	0.00%	0.00%
Expected stock price volatility	<b>68.72%</b>	68.93%	74.70%
Risk-free interest rate	<b>3.34%</b>	4.12%	4.08%
Expected life of options	<b>3.38 years</b>	4.12 years	5.0 years

Option pricing models require the input of highly subjective assumptions including the expected price volatility. Changes in the subjective input assumptions can materially affect the fair value estimate, and therefore, the existing models do not necessarily provide a reliable single measure of the fair value of the Company's stock options.

**e) Performance Shares**

A total of 2,187,482 performance shares were reserved for issuance. At the discretion of the Board, these shares may be issued to such arm's length parties as the Board considers desirable to attract consultants and/or employees to the Company.

During a prior year, the Board authorized the issuance of up to 400,000 performance shares at an exercise price of \$0.01 per share to attract a Vice-President of Business Development to the Company. These shares are to be granted as follows:

Shares	Date	
50,000	5 September 2005	(issued)
50,000	5 March 2006	(issued)
50,000	5 September 2006	(issued)
50,000	5 March 2007	(issued)
50,000	5 September 2007	(issued*)
50,000	5 March 2008	(issued**)
50,000	5 September 2008	(reserved for issuance***)
50,000	5 March 2009	(reserved for issuance****)
<u>400,000</u>		

\* 50,000 performance shares were reserved for issuance at \$0.01 per share during the prior year. The fair market value of the performance shares at the date of the allotment/accrual was \$71,000 and was recorded in the accounts as consulting fees in the prior year. The offsetting entry was to contributed surplus. During the current period, these shares were issued for total proceeds of \$500 with the offsetting entry to share capital.

\*\* 50,000 performance shares were issued at \$0.01 per share for total proceeds of \$500 during the period. The fair market value of the performance shares at the dates of allotment was \$83,500 of which \$64,675 was recorded as stock-based compensation in the prior year and \$18,825 recorded in the current period. The difference between the issue price and the fair market value was recorded in the accounts as stock-based compensation. The offsetting entry is to share capital.

#### 8. Convertible Long Term Loan

During the period, a US \$1,791,000 convertible loan was obtained secured against bulk sampling related equipment at Golden Summit and against private property that was purchased in January 2008 adjacent to the Golden Summit property. The loan has a term of 2 years, with the Lenders having the right to accelerate the maturity of the facility any time after the first anniversary of the closing, should the Company raise additional debt, equity or receive asset sales aggregating \$3 million or more. The Lenders also have the right during the term to convert the outstanding principal, in whole or in part, into the Company's common shares at a conversion price of US \$1.23/share. The interest rate for the loan is 4% per annum, payable quarterly. No fees were paid in relation to the closing or arrangement of this facility.

#### **9. Short Term Loans**

On 31 July 2008, the Company secured a US \$2 million short term loan financing. On 22 August 2008, the Company received from a second lender an additional US \$2 million short term loan, bringing total short term loan proceeds to US \$4 million.

The first US \$2 million bridge loan facility has a maturity date of 15 January 2009. Terms for this facility include an annual interest rate of 12.5% payable monthly, a cash closing fee, and 350,000 warrants to the lenders to purchase common stock of the Company for a two year period at a price of \$0.66 per share. The lenders will have the right to put the warrants back to the Company one year after closing of the bridge for a value of \$100,000. The second US \$2 million loan has the identical terms, except the strike price of the warrants is at \$0.55 per share.

Collateral for the loans is a first priority pledge of the shares in the Company's wholly owned US subsidiaries and a general security agreement against the personal property of the Company (including a second charge against the processing and private property assets currently collateralizing the loan detailed in Note 8.) The loans can be prepaid at any time, and all proceeds generated from subsequent financings must be used to repay the loans.

These warrants have a value of \$200,000 of which \$63,521 has been expensed during the period. The balance of \$136,479 is shown as a deferred financing cost.

---

#### **10. Income Taxes**

A reconciliation of income taxes at statutory rates with the reported taxes is as follows:

	2007	2006
Loss before income taxes	\$ 4,384,463	\$ (1,772,633)
Expected income tax (recovery)	\$ (1,495,102)	\$ (604,468)
Items not deductible for income tax purposes	1,025,844	204,828
Unrecognized benefit of non-capital losses	469,258	399,640
Total income taxes	\$ -	\$ -
Represented by:		
Current income tax	\$ -	\$ -
Future income tax	\$ -	\$ -

### 10. Income Taxes – Continued

The significant components of the Company's future income tax assets and liabilities are as follows:

	2007	2006
Future income tax assets		
Financing costs	\$ 36,787	\$ 30,101
Loss carry-forwards	7,720,549	8,163,302
Undepreciated capital cost in excess of accounting net book value	174,539	115,613
Mineral properties	6,252,637	387,366
	14,184,512	8,696,382
Valuation allowance	(14,184,512)	(8,696,382)
Net future income tax assets	\$ -	\$ -

The Company has non-capital losses for Canadian tax purposes of approximately \$6,000,000 available to offset against taxable income in future years, which, if unutilized, will expire through to 2027. In addition, the Company has net operating loss carryovers for US tax purposes of approximately US\$16,400,000 available to offset against taxable income in future years, which, if unutilized, will expire through to 2027. Subject to certain restrictions, the Company also has resource exploration expenditures of approximately \$18,000,000 available to reduce taxable income of future years. Future tax benefits which may arise as a result of these losses, resource deductions and other tax assets have not been recognized in these financial statements, and have been offset by a valuation allowance.

### 11. Commitments

- i) The Company has outstanding and future commitments under mineral property option agreements to pay cash and issue common shares of the Company (*Note 4*).
- ii) The Company has outstanding future commitments related to share purchase warrants and options (*Note 7*).
- iii) The Company is committed under operating lease agreements for its office premises in Kerrisdale, downtown Vancouver and Weiser, Idaho with the following estimated lease payments and dates:

Fiscal year ended Dec. 31,	2008	2009	2010
Office lease - Kerrisdale	\$38,460	-	-
Office lease - Vancouver	\$9,285	\$21,667	-
Office lease - Idaho	\$8,586	\$14,310	-
